Autotome™ RX

Cannulating Sphincterotome

Flexible and Responsive Design

Direct Wire Technology™ is designed for flexibility and responsiveness to aid in precise sphincterotomy

- Tip orientation and cut-wire positioning capabilities developed to facilitate cannulation
- Range of tapered tip sizes: 3.9Fr, 4.4Fr and 4.9Fr tip sizes to accommodate varying patient anatomy
- 5cm – 7cm exchange length engineered for single-operator control
- Option to transition from over-the-wire to short-wire ERCP technique without removing devices from the endoscope

RX Biliary System™

We're in!™

The RX Biliary System helps put the physician in control of the guidewire. Using the RX Locking Device, the physician can secure the guidewire to maintain access while exchanging devices.

The RX Biliary System and its compatible devices offer a broad portfolio of products for pancreatico-biliary stone and stricture management.

Merging Lumen Technology™

Proximal lumens merge into a single distal lumen on RX 39 and RX 44 Sphincterotomes

- Developed to facilitate contrast injection while maintaining guidewire access through open lumen technology
- May help reduce the risk of submucosal injection by allowing contrast flow to be diverted

RX 39

RX 44

RX 49

RX LOCKING DEVICE[†]

Guidewire locks in place to maintain access

- Available with short 260cm guidewire or a standard 450cm guidewire to meet physician technique preferences
- Guidewire may be locked and unlocked at any time during the procedure
- Facilitates device exchange, contrast injection and biliary therapy

- A** Locking device has notches for fixation of one or two wires
- B** Biopsy port cap designed to reduce air and bile leakage
- C** Strap secures it below the biopsy port

[†]RX Locking Device sold separately.

FLEXCONTROL SYSTEM*

Developed to aid in precise sphincterotomy

- Engineered to enhance guidewire manipulation and bowing control

TIP ORIENTATION

Ergonomic, rotating handle engineered for excellent control

- Designed to aid precise tip movement and wire manipulation to facilitate cannulation
- Handles labeled with respective tip outer diameter for ease of selection*

*Autotome RX 39 and RX 44 Sphincterotomes only.
